Notice Concerning Variance Request from Hazardous Waste Regulations

The Kansas Department of Health and Environment is providing public notice that on March 22, 1996, the EPA Region 7 RCRA Storage Facility, 25 Funston Road, Kansas City, Kansas, submitted a request for renewal of a variance from specific hazardous waste regulations in accordance with K.A.R. 28-31-13(a). The current variance request will expire December 5, 1996. The variance is requested from K.A.R. 28-31-4 and 40 CFR 265.176, which require the storage of containers holding ignitable hazardous waste must be located at least 15 meters (50 feet) from the facility's property line.

The EPA stores ignitable solvents. The room is separate from the laboratory facility, is the most acceptable location for the storage of ignitable wastes, and is designed to be explosion proof. Positive ventilation is provided to reduce vapor concentrations in the event of a spill, thereby reducing the chance of explosive concentrations. The EPA believes locating the room at another location is not possible due to space limitations. KDHE has reviewed the variance request and concluded that the variance is

justified.

In accordance with K.A.R. 28-31-13(b), public notice was provided that KDHE considered the request for a variance justified and made a tentative decision to grant the variance. A public comment period to receive comments regarding this tentative decision was established between April 25 and May 25, 1996. No public comments were received.

Therefore, in accordance with K.A.R. 28-31-13(b), KDHE announces its decision to approve this request for a variance and not to include any special conditions. The variance shall become effective on June 6, 1996, and shall remain in effect until June 6, 2006.
